

Nguyen Le Nam Anh

PERSONAL DETAILS

- Name **Nguyen Le Nam Anh**
- Nationality Vietnamese
- Date of birth 05/10/1998
- Sex Male
- Marital status Single
- Phone No. 0703620282
- Email nguyenlenamanh.2016@outlook.com

EDUCATIONAL BACKGROUND

- IUH UNIVERSITY (From 2016 To 2020) – Major: Software Engineering – GPA 3.63 (High Distinction)

PROFESSIONAL SUMMARY

- I am in top graduation in my university and currently working as .NET Developer at FSoft in the position of technical lead.
- Worked in software development fields in almost 2 years. And got technical lead role of a small team (6 persons) is my proud.
- I am considered a quick learner, a problem solver and tech lover by co-workers and leads and I extremely love to research new techs/frameworks then apply it into project.
- I am also a lazy person, so I always think carefully before I do, because I don't want to fix after I implement something.
- Because I am a tech lover & creative person, so I always want to learn new technology and build something with it. So if I can work in the environment with full of new techs and problems then I will be extremely happy to work and don't care about OT.

SKILLS

- .NET stacks: LinQ, Entity Framework, ASP.NET MVC, ADO.NET, SQL Server, Window form,... (Main skill → Advanced Level)
- MERN stacks: Nodejs, Reactjs, MongoDB (Side skill → Intermediate level)
- Clouds stacks: GCP (Cloud function, SQL for cloud, ...), Azure (Functions, Service Bus, Blobs...) → (I have a little knowledge in this field, but I want to explore more in these cloud fields.)

PROFESSIONAL EXPERIENCE

09/2021 – Now

Working as Senior Developer at FSoft

Project: DTH (Web App)

Project Description:

Implements new features for customer. This project is about build a tax calculate tax for US government.

Responsibilities

- Read source code to know business
- Implement new feature after discussing with BA and investigate the source code
- Help team lead to interview member

Technologies Used:

Software environment

- ASP.NET Web APIs
- SQL Server
- Azure (Blob, Service Bus...)

08/2020 – 11/2021

Working as Leader & Senior Developer at FSoft

Project: SSM (Web App)

Project Description:

Implements new features for customer. This project is about import master data for lixil management system, and it has difficult business logic. It requires good code reading skill & sql query reading skill to understand business logic.

Responsibilities:

- Read source code to know business then transfer it for team members to implement.
- Review source code
- Research and build a structure that helps convert web form to mvc a lot simpler and less bugs.
- Fix critical bugs in production → I know more about load balancing & read logs in this phase.
- Interview member for team.

Technologies Used:

Software environment

- ASP.NET MVC
- SQL Server
- GCP (Storage, Load balancing, VM,...)

02/2020 – 07/2020

Working as Junior Developer at FSoft

Project: Lixil (Web App)

Project Description:

Migrate customer web app from vb to .net core 3.1

Responsibilities:

- Migrate backend from vb to c#
- Design and execute unit test (to confirm that your migrated code work)
- Migrate front end (webform to mvc using razor page)

Technologies Used:

Software environment

- ASP.NET MVC
- SQL Server

09/2019- 12/2019

Intern at School Lab Cooperation with Systra.co.jp

Project: Unibo (Robot)

Project Description:

Unibo (robot) recognizes elderly with their faces, then sends, receives data from server and interacts with them in nursing home.

Responsibilities:

- Develop Face Recognition for Unibo with Azure Face API
- Find and suggest technology (nodejs + mongodb + azure face api) for teacher to approve.
- Help teacher to analysis and design database.
- Build backend API for robot to communicate.
- Learn how to use robot (customized version of node-RED)

Technologies Used:

Software environment

- NodeJS
- Azure Face API

09/2016 - 12/2019

Student at Industrial University of HCMC

During the 3.5 years of studying at school, I worked on projects such as news website (ASP.NET MVC), Graduation thesis management software (Winform), Work assignment software (WCF), Video Rental Store System (UWP), Ecommerce Website (NodeJS, DynamoDB, AWS Cloud Services). For my current project for graduation, I am using neo4j and nodejs for creating a social network.
